

Senior Medical Writing Specialist

Since 1987, Gilead Sciences has worked to discover, develop and commercialize medications to advance the care of patients suffering from life-threatening diseases in areas of unmet medical need. Headquartered in Foster City, California, the company has expanded rapidly over the past two decades, with annual revenues in 2010 reaching nearly \$8 billion, operations spanning four continents and a staff of approximately 4,200 employees.

An exciting and challenging opportunity has arisen to join the International Medical Writing team. The successful candidate will prepare a wide range of documents, including clinical study reports, investigator brochures, common technical document overviews/summaries, and paediatric investigation plans. They will support submission teams and regulatory project teams, providing advice and guidance for optimal presentation of data to achieve document objectives. They will work collaboratively with functional contributors (clinical, biometrics, etc.) and other writers to ensure all source data are appropriately reported in terms of accuracy, completeness, and scientific interpretation, and in accordance with project timelines.

It is envisaged that the successful candidate will be degree educated and have significant medical writing experience. Experience preparing a variety of document types is desirable, including clinical study reports. Candidates must have excellent verbal and written communication skills, and have demonstrated ability to work in cross-functional teams.

The ideal candidate will align with Gilead's core values by being accountable for their work, displaying integrity in everything they do, thriving in a team environment, and seeing excellence as the only measure of success.

This role is office-based in Cambridge in the UK.
